EXTREMITIES

By William Mastrosimone

Mastrosimone's searing and shocking play, *Extremities* transfers to the Tabard Theatre following its successful revival at The Courtyard Theatre earlier this spring.

A Day like Any other: Nothing new is planned for Marjorie's morning other than clearing away the breakfast plates left by housemates Terry & Patricia, until this morning brings two unwelcome visitors: the first, a wasp that stings Marjorie but escapes, the second, Raul, a stranger & serial rapist that strikes but is captured.

This time he has met his match. The housemates return to find the tables turned and Marjorie in control of Raul but not quite of herself. And as her rage consumes her, Marjorie shocks her friends with a proposal that challenges the perilously thin line between justice and vengeance...

Extremities is a chilling and disturbing journey of exploration through the impulses of self-preservation and revenge. This production by Epsilon productions has been nominated for 'Best Play' in the London Festival Fringe Awards and now plays a limited run at the Tabard Theatre.

'Extremities' contains strong language and scenes of a violent nature which some people may find disturbing. Over 15's only.
